

Environmental policy

Preamble

Volkswagen Poznań manufactures cars and cast products to insure individual mobility. The company is responsible for continuous improvement of products in terms of meeting the environmental requirements and for the reduction of natural resources burden with simultaneous consideration of economical aspects. The company makes available modern technologies, effective in terms of environment protection, and applies them in the entire life cycle of the products. The company is a partner for the society and political circles in the forming of sustained development in the social and ecological aspects.

Principles

1. The declared purpose of Volkswagen Poznań is maintaining the possibly lowest impact of its activities on the natural environment and using all its abilities for cooperation in solving regional and global environmental problems.
2. The purpose of Volkswagen Poznań is offering highly valuable cars, meeting in equal degree the environmental, economical, safety, quality and comfort requirements.
3. In order to ensure over the long term the protection of the company and the improvement of its competitiveness, Volkswagen AG studies and develops environment-effective products, processes and concepts in the area of individual possibilities of moving about.
4. Through the environmental policy, the environment management in Volkswagen Poznań guarantees that together with cooperating parties, service providers, commercial partners and enterprises dealing with recycling, the production sites and the products themselves are subject to the process of continuous improvement in terms of meeting the environmental requirements.
5. The management of Volkswagen Poznań controls regularly the compliance with environmental policies and targets as well as functioning of the environment management system. This includes the assessment of the recorded data important for the environment.
6. Unequivocal and clear information and dialogue with customers, dealers, and community are fundamental issues for Volkswagen Poznań. Cooperation with political circles and authorities is based on action oriented and confidence basis and it considers preventing the emergency situations.
7. All employees of Volkswagen Poznań are, according to their respective tasks, informed, trained and motivated on environment protection. They are committed, within their specific tasks, to fulfil the legal requirements.
